Namakkal

PROJECTS

Revv.co clone

A website for self-drive car rental service, that allows users to explore the world of self-drive, travel, road trips, and more.

Goodread clone

A website that allows individuals to search its database of books, annotations, quotes, and reviews. Users can sign up and register books to generate library catalogs and reading lists.

Activities

Masai Hackathon

- Collaborated with two more developers to create a patient-friendly website that helps patients find a hospital with the availability of beds and oxygen for covid19
- The tech stacks are Next.js and MongoDB
- I was responsible for the user interface and user experience of the map

Full Stack Web development (Full-time)

- MERN Stack
- Data Structures
- Algorithms
- Soft Skills

Bachelor of Engineering

- Civil

Higher Secondary Certificate

- Computer Science

- Collaborative project developed with two more developers within one week
- The website was built on the tech stack of JavaScript, React, Node.js, and MongoDB for data handling
- I was responsible for handling the data and the user interface of the subscription page and payment page
